

BSCS – C2047OOP

Problem 1:

```
rows = int(input("How many rows: "))
cols = int(input("How many cols: "))
print("Multiplication table")

for c in range(1, rows + 1):
    for j in range(1, cols + 1):
        print(f"{c * j:4}", end=" ")
    print()
```

Sample Output 1

```
How many rows: 10
How many cols: 10
Multiplication table
 1   2   3   4   5   6   7   8   9  10
 2   4   6   8  10  12  14  16  18  20
 3   6   9  12  15  18  21  24  27  30
 4   8  12  16  20  24  28  32  36  40
 5  10  15  20  25  30  35  40  45  50
 6  12  18  24  30  36  42  48  54  60
 7  14  21  28  35  42  49  56  63  70
 8  16  24  32  40  48  56  64  72  80
 9  18  27  36  45  54  63  72  81  90
10  20  30  40  50  60  70  80  90 100
```

Sample Output 2

```
How many rows: 3
How many cols: 5
 1   2   3   4   5
 2   4   6   8  10
 3   6   9  12  15
```

Problem 2. Create a bank program that will allow the user to perform the ff: Use Functions as Necessary

```
balance = 1000

def show_balance():
    print(f"Your balance is {balance:.2f}")

def deposit():
    global balance
    amount = float(input("Enter amount to be deposited: "))
    balance += amount
    print(f"Your balance is {balance:.2f}")

def withdraw():
    global balance
    amount = float(input("Enter amount to be withdrawn: "))
    if amount > balance:
        print("Insufficient funds.")
    else:
        balance -= amount
        print(f"Your balance is {balance:.2f}")

def atm_menu():
    while True:
        print("\nABCODEE ATM")
        print("*****")
        print("1. Show Balance")
        print("2. Deposit")
        print("3. Withdraw")
        print("4. Exit")
        print("*****")
        choice = input("Enter your choice (1-4): ")

        if choice == '1':
            show_balance()
        elif choice == '2':
            deposit()
        elif choice == '3':
            withdraw()
        elif choice == '4':
            print("Thank you for using ABCODEE ATM!")
            break
        else:
            print("Invalid choice. Please enter a number from 1 to 4.")

atm_menu()
```

```
ABCODEE ATM
*****
1. Show Balance
2. Deposit
3. Withdraw
4. Exit
*****
Enter your choice (1-4):
```

```
*****
Enter your choice (1-4): 1
Your balance is 1000.00
```

```
*****
Enter your choice (1-4): 2
Enter amount to be deposited: 20
Your balance is 1020.00
```

```
*****
Enter your choice (1-4): 1
Your balance is 1020.00
```

```
*****
Enter your choice (1-4): 3
Enter amount to be withdrawn: 520
Your balance is 500.00
```

```
*****
Enter your choice (1-4): 1
Your balance is 500.00
```
